

PANEL

BUILT-IN SOLUTIONS

PANEL

PANEL is an innovative built-in solution designed to optimise hygiene and functionality in public and commercial restrooms. By seamlessly integrating handwashing and drying into a stylish, space-saving unit, PANEL creates a clean and organized environment that enhances the user experience.

With a mirrored front PANEL ensures a modern and minimalist aesthetic while keeping essential hygiene features discreetly in place. The system is completely touch-free, featuring a built-in sensor-activated hand dryer and soap dispenser or an alternative configuration with a soap dispenser and paper towel dispenser.

Intuitive LED indicators on the mirror provide clear guidance for effortless operation, making PANEL a user-friendly choice for high-traffic locations such as airports, shopping malls, and office buildings.

Available in multiple sizes with optional infill panels, PANEL can be customised to fit a wide range of restroom layouts, offering both flexibility and sophistication.

By combining smart design with advanced hygiene technology, PANEL is the perfect solution for those looking to create a modern, efficient, and aesthetically pleasing restroom experience.

PANEL

PANEL is a sleek, built-in hygiene solution that seamlessly combines a touch-free hand dryer and soap dispenser within a stylish mirrored cabinet.

Designed for efficiency and aesthetics, PANEL integrates effortlessly into wash stations, offering a clean and organized restroom experience.

Available in two sizes — 670 x 800 mm or 600 x 800 mm — it provides flexible installation options to suit various spaces, with matching infill panels also available in two sizes for a perfect fit.

This compact 2-in-1 system discreetly conceals the hand dryer and soap dispenser behind the mirror, preserving a sleek, modern aesthetic while enabling hygienic, touch-free operation. LED indicators provide intuitive guidance, and the spacious 850 ml soap dispenser reduces the need for frequent refills. With a rapid 10-15 second drying cycle, users enjoy quick and efficient hand drying.

Wall-mounted for easy installation and maintenance, PANEL features a front-opening design for quick servicing, saving valuable time for facility staff.

Engineered for high-traffic environments such as airports, shopping malls, offices, and stadiums, it delivers an optimal balance of convenience, hygiene, and modern design.

PANEL

PANEL is a sleek, built-in hygiene solution that seamlessly combines a touch-free soap dispenser and paper towel dispenser within a stylish mirrored cabinet.

Designed for efficiency and aesthetics, PANEL integrates effortlessly into wash stations, offering a clean and organized restroom experience.

Available in two sizes — 670 x 800 mm or 600 x 800 mm — it provides flexible installation options to suit various spaces, with matching infill panels also available in two sizes for a perfect fit.

This space-saving 2-in-1 system keeps dispensers discreetly hidden behind the mirror, maintaining a streamlined look while ensuring hygienic, touch-free operation. LED indicators guide users intuitively, while the generous soap dispenser (850 ml) and paper towel capacity (Up to 500 pcs. Z/W folded paper towels.) minimize refill frequency.

Wall-mounted for easy installation and maintenance, PANEL features a front-opening design for quick servicing, saving valuable time for facility staff.

Engineered for high-traffic environments such as airports, shopping malls, offices, and stadiums, it delivers an optimal balance of convenience, hygiene, and modern design.
