

NEW ACCESSORIES

- more solutions for your customers

Our range of accessories will soon be even broader, offering you even more opportunities to provide versatile and functional solutions to your customers.

The new products are perfect for both larger residential developments, where all rooms need to be equipped with uniform solutions, as well as for smaller, private customers, where the local plumber assists with advice and installation.

UNIVERSAL HANGER – FLEXIBLE AND STYLISH SOLUTION

Available in both single and double versions. Ideal for restrooms, offices, entryways, kitchens, and more.

NEW TOILET PAPER HOLDERS

Available in 3 variants. All fit a standard toilet roll.

- Standard toilet roll holder. A classic and sleek solution.
- Spare toilet roll holder. Ensures an extra roll is always within reach. Increased comfort and less maintenance.
- Toilet roll holder with shelf. A practical combination of storage and functionality. Ideal for mobile phones or small items.

These toilet paper holders are particularly well-suited for smaller restrooms where space is limited. With their compact design and smart features, these solutions ensure optimal use of space – without compromising on functionality or aesthetics.

UNIQUE MOUNTING OPTION

The new solutions can be mounted back-to-back, meaning the products are installed on both sides of the wall. This reduces the number of required drill holes and makes the installation process more gentle and efficient.

All new products are available in our standard colors as well as RAL Classic special colors, ensuring a perfect match for any design.

Ready for delivery from May 1st.
