# NEW LOKI SANITARY BIN

Introducing the Latest Addition to the LOKI Series: The compact **3-liter sanitary bin**. Perfect for smaller commercial and public restrooms where space is limited, yet hygiene remains a top priority.

With its robust front panel, distinctive 'I' detail, and sleek design, the new hygiene bin seamlessly integrates into the LOKI family. It ensures a cohesive and elegant restroom aesthetic while providing a discreet and functional waste solution.

## NEW SALES AND MARKETING OPPORTUNITIES

The smaller 3-liter model makes it possible to reach customers for whom the 11-liter version is too large. This opens up new segments such as small cafés, boutique hotels, offices, and exclusive retail stores, where space optimisation is essential.

With this compact solution, you can meet customers' needs for discreet and hygienic waste management without compromising on design. At the same time, it presents an upselling opportunity for existing customers who want a complete LOKI solution across different restroom sizes.

By offering both 3-liter and 11-liter versions, you can differentiate yourself in the market and attract a broader customer base, increasing both volume and revenue potential.

Available in standard colors as well as optional RAL Classic. Like the rest of the LOKI series, you can also add print for a unique look.

Ready for delivery from February 19, 2025.
