

# DAN DRYER TAPS

# THREE IN A ROW

TAPS is a product line consisting of sensor-operated high-speed hand dryers, soap dispensers and water faucets in an elegant slim design.

Wash and dry your hands without moving from the sink, thus eliminating water dripping on the floor.

The product design stands out thanks to its practical, hygienic and space-saving features. The products are hidden below deck or behind the wall with only the spout affixed to the wash basin/wall.

The products are visually appealing and can be installed separately or as a complete family.

A solution that works for a modern look and frees up more wall space in commercial washrooms; ideal for architects and construction projects to integrate at the very beginning of the design thinking phase.

Available in stainless steel and with PVD coating in the colours, black, brushed champagne, gold, brass, rose gold, and brown.

There are places where people stay for a moment. And where the design must perform every single second

# DECK-MOUNTED TAPS

## Airtap

- Stainless steel with satin finish
- Touch-free hand dryer with IR sensor
- Drying cycle of 10-15 sec.
- Tube length: 1200 mm
- Power connection: 230 V, 50/60 Hz, Class I
